

Bechtel & Petrojet Sign Commissioning Training Services Agreement

Bechtel has been selected to provide Commissioning Training Services to Petrojet to develop its Commissioning Department. This agreement is a perfect example of collaboration with a local partner to provide capacity building of its workforce, expanding Petrojet's capability in Commissioning. The training will help build the Petrojet Commissioning team up to Bechtel's international standards. It will also allow Petrojet to create a full set of Commissioning procedures to be used by Petrojet for any future project. Furthermore, the plan is for the trained Petrojet Commissioning team to support Bechtel to execute the Commissioning activities on the Red Sea Suez Petro-Refinery project. A consortium of Bechtel, Enppi and Petrojet has been established to execute the largest Petrochemicals complex in Africa.

"We are delighted to provide this service to our partner Petrojet and continue our support for the Ministry of Petroleum's Modernization Program. Egypt continues to be a key regional market for our Energy business and is at the core of our long-term strategic plan," El-Dessouky said.
