

## **Reenergizing the East Med: A Collaborative Workshop to drive Implementation, Growth & Efficiency**

**7-8 May - Tolip El Galala Hills - Ain Sokhna**

### **Overview**

The "**Reenergizing the East Med**" workshop is a two-day strategic gathering designed to **boost gas production, strengthen regional collaboration, and accelerate EMGF's implementation agenda**. This event will bring together **government officials, industry leaders, regulators, and technical experts** to tackle the region's most pressing challenges.

- **Day 1: Increasing Gas Production** – Focused on strategies to **enhance exploration, optimize infrastructure, and ensure supply security** through **expert discussions and technical workshops**.
- **Day 2: EMGF's New Strategy & Implementation** – Shifting from discussion to action, as **seven Implement Workshop Groups** translate EMGF's studies into concrete action plans.

The workshop will conclude with a **roundtable discussion**, setting a roadmap for the **implementation of EMGF initiatives in 2025-2026**.

### **Day 1: Increasing Gas Production**

Focus: Strengthening **gas exploration, production efficiency, and infrastructure resilience** while integrating environmental responsibility.

### **Format: Interactive Workshops**

Participants will engage in **technical workshops** exploring new technologies, regulatory frameworks, and best practices to optimize gas production.

### **Key Topics:**

- **Gas Supply & Exploration** – New technologies, regional market dynamics, and infrastructure challenges.
- **Infrastructure Optimization** – LNG enhancements, pipeline resilience, and midstream efficiencies.
- **Emissions Reduction & Decarbonization** – Methane mitigation, CCUS applications, and reducing flaring/venting.

### **Expected Outcomes:**

- Identification of innovative production technologies and regulatory solutions.
- Strengthened collaboration between industry, government, and technology providers.

## Day 2: EMGF's New Strategy & Implementation

Focus: **Translating strategy into action** through structured workshops within **seven Implement Workshop Groups**.

### Implement Workshop Groups:

1. **Interconnectivity & Export Solutions** – Addressing tie-back and infrastructure integration challenges.
2. **Supply & Demand Modeling** – Creating a regional gas balance model for planning and investment.
3. **Harmonized Export Regulations** – Defining quality benchmarks and pricing guidelines.
4. **Exploration & Infrastructure** – Promoting new exploration and investment.
5. **Production & Processing** – Expanding gas processing and LNG infrastructure.
6. **Decarbonization Projects** – Implementing EMGF's 6-year decarbonization roadmap.
7. **Carbon Intensity Certification** – Establishing compliance mechanisms for international standards.

### Roundtable Discussion & Expected Outcomes:

- Key takeaways of the technical workshops
- Alignment on regulatory, technical, and commercial aspects of gas sector development.
- A roadmap for EMGF's 2025-2026 implementation phase.

### Target Audience

- Government Representatives
- Private Sector Leaders & Investors
- Regulators & Policymakers
- Research & Environmental Institutions

### Workshop Impact

- Strengthened public-private collaboration.
- Concrete implementation plans for EMGF's gas and decarbonization strategies.
- Adoption of advanced gas technologies & infrastructure improvements.
- A defined roadmap for a **more efficient, competitive, and future-ready East Med gas sector**.

This workshop marks a **critical step in EMGF's shift from strategy to implementation**, ensuring real-world progress in the region's gas sector.
