

PETRONAS Egypt Powers Knowledge for Over 1,600 Students in Cairo

CAIRO, EGYPT, 24 September – PETRONAS through its subsidiary in Egypt has launched a new computer lab at Mustafa Musharafa School, paving the way for more than 1,600 students to gain and build essential digital skills and embrace technology in learning.

The initiative is part of PETRONAS Egypt commitment to supporting education and community development, while contributing to Egypt’s Vision 2030 goals for inclusive and equitable learning opportunities.

The digital lab is designed to develop and empower future-ready talents by enhancing digital literacy and fostering innovation, in line with national priorities for human capital development and technological resilience.

More than just an investment in infrastructure, PETRONAS Egypt is providing young learners with the digital tools they need to thrive in a rapidly evolving job market.

“Education is the foundation for lasting change, and at PETRONAS, we are committed to empowering future generations. By supporting schools like Mustafa Musharafa, we’re not only enhancing educational environments—we’re helping to shape the future generation of students,” said Hany Esmat, Chief Executive Officer and Country Chair of PETRONAS Egypt.

This initiative embodies PETRONAS’ wider societal and sustainability goals, which focuses on creating long-term value for society through responsible social investments – powering knowledge, enriching lives for a sustainable future.
